

S. M. B. Education Society's  
**M. S. BIDVE ENGINEERING COLLEGE**  
Latur - 413 512 (Maharashtra State)

### VISION

To attain technical excellence for the welfare of mankind.

### MISSION

It is our mission to impart qualitative technical education at affordable cost for the students hailing from vernacular background and deprived classes. It is our conviction to make them competitive in global environment through dissemination of knowledge, development of technical and social skills and by inculcating human values. We, the Management, Faculty and Staff find the privilege and pride to commit whole heartedly to accomplish this goal.

### IMMINENT GOALS

- To improve communication and presentation skills of students.
- To achieve top order results of all classes.
- To boost up training and placement performance to higher benchmark.
- To develop membership bonds with professional bodies.
- To organise seminars and workshops at faculty and students' level.
- To launch P.G. programmes in all streams of engineering.
- To upgrade all round infrastructure facilities.

### PERPETUAL GOALS

- Improving faculty academic profile through sponsorship for P.G. & Ph.D. programmes.
- Promoting institutional role as interface between industry, statutory authorities, funding agencies and professional bodies.
- Engaging institutional participation in technical education quality improvement programmes at all levels.
- Establishing technical research and development centre for rural upliftment.
- Marching towards the accomplishment of institutional autonomy.

- A retinae called M.S.Bidve Engineering College.

## Electrical, Electronics and Power Engineering

Introduction

Programme Outcomes

Faculty

Facilities

Events

### Programme Outcomes

Goal of the Electrical (Electronics and Power) Engineering is to provide students with preparation to become worthy of professional careers in the field and to be motivated for lifelong learning. All prescribed courses have definite objectives and outcomes.

At the end of the program the student will be able to:

- Apply knowledge of Mathematics, Science and Engineering to solve the complex problems in Electrical and Electronics Engineering.
- Identify, formulate, design, analyze and implement an electrical and electronics system, component, or process to meet desired needs.
- Design system components that meet economic, environmental, social, political, ethical, health and safety, and sustainability requirements.
- Conduct investigations of complex engineering problems including design of experiments, analysis and interpretation of data, and synthesis of
