In given above definition of SD it should be well planned activity which improving life Style of people. Er. of poverty and increase the actual income of people, improvement of own lives and improvement in education, improvement in health section, improving natural resources which leading to development of economy.

2.2. Sustainable Development Goals and Library:

Sustainable Development Goals

The concept of Goals is setting target and fulfilments of its. Webster's Universal Dictionary and Thesaurus (2010) defined goals as objectives. Invariably Goals may be viewed a set targets to be met as to bring about development that can be retain for the present and future leading to improvement of lives And other material resources for the welfare of the entire communities.

United Nations documents (2015) cited in Agbade (2015) identified some objectives of development of Policies and sustainable development to include.

Reviving growth

- Changing the quality of growth
- Meeting essentials needs for jobs, food, energy water and sanitation
- Ensuring a sustainable levels of population
- Conserving and enhancing the resources base
- Reorienting technology and managing risk; and
- Merging environment and economics in decision making.

Babarinde and Saulawa, described sustainable development goals as a stated developmental aims acting as the incubator upon which the developmental end products are hatched. Babarinde and Salauwa, viewed sustainable development from economic growth that emphasizes improving the quality of life of all citizens while conserving the environment and national resources for the future generation but when some stated developmental aims are linked to sustainable development its therefore referred to as sustainable development goals.

2.3 Library: A library is a collection of materials, books or media that are easily accessible for use and not just for display purposes. It is responsible for housing updated information in order to meet the user's needs on a daily basis. A library provides physical (hard copies documents) or digital access (soft copies) materials and may be a physical location or a virtual space, or both. A library's collection can include printed materials and other physical resources in many formats such as DVD, CD and Cassette as well as access to information, music or other content held on bibliographic databases.

DR.S.R.Rangnathan

"A library is a public institution or establishment charged with the care of collection of books and the duty of making them accessible to those who require to use them". Here, the term 'book' symbolizes the library collection which may be book, periodicals, or any other material kept in a library."

LIBRARIES SUPPORT SUSTAINABLE DEVELOPMENT GOAL

Following are the key points in related to Sustainable Development goals

- Promoting Literacy, which include print and digital, also information literacy and Skills with help of dedicated staff.
- Minimise gaps to access information and help the Government, Civil society, Industrial area to understand local needs of Information in better way.
- Adopt recent trends in digital including through access to Information and technology.
- Provide latest development to researcher and academic Community
- Development of knowledge modules having the right content to take care of the aspirations of academic community and to address to the personalized needs of the learners (NMEICT)
- Continuous Professional Development in Library and Information Science.

3. Global best practices through libraries and information science professionals for sustainable goals:

Following are best practices should adopted for sustainable development goals

- Library collection will be qualitative
- Library provide adequate Funds

GLOBAL BEST PRACTICES ADOPTED FOR SUSTAINABLE DEVELOPMENT GOALS THROUGH LIBRARY AND INFORMATION SCIENCE PROFESSIONALS

Abstract: This paper highlighted on sustainable development goals using some standard practices in Library and Information Science and its professionals. Major concepts namely Global Practice, Goals of Libraries, Information science, Sustainable Development, professionals related to the Library and information science. Also highlighted on needs of Sustainable Development to achieve the goals. Historical development of Sustainable Development. The role Library, Librarian, professionals in information and Communication Technology, Sustainable Development, for 2030 Agenda adopted by the UN General Assembly in 2015, achieve the 17 goals

Keywords: Sustainable Goals, Global Best Practice, Library and information Science, United Nation (UN)

1. Introduction The sustainable development in library and information science is relatively a new research field. The sustainable development word is more significant in last few years. It is used in more discipline in every sector. Understanding of sustainable development challenges in Library and Information Science (LIS) in terms of complexity and diversity. Also it high light on Global Best Practices adopted in Library and Information science. Also focus on challenges in sustainable and overcome on these challenges. United General Assembly agenda in related to Library and Information Science to gain this goals.

2. Materials and Methods:

2.1 Sustainable Development: Sustainable development as a concept has a great relationship with improvement of activities, programmes and striving to maintain and build on them. Development is views as a process relating to or has to do with the progressive transformation of economy and society. Many scholars have defined sustainable development in various ways. Okeke, Ibegbulam, Orakpor and Asom, suggested that to better understand the concept of sustainable development, the concepts should be conceptually be defined separately. He defined development as the quantitative and qualitative transformation of societies from one stage to another. Also on the other hands Olutayo and Bankole, described development as involving the process of change in environment, a central ingredient the transformation of any society.

Also World Commission on Environment and Development (WCED) (1987) defined sustainable development as "the development that meets the needs of the present without compromising the ability of future generations to meet their own needs"

According to UNESCO (2005) it policies incorporates other areas such as education, culture, population, animals and plants species, ecosystem, natural resources, fight against poverty, promotion of gender equality, inter-cultural dialogue among others.

Onyido and Odum (2014) viewed sustainable development emphatically as the creation of sustainable improvements in the quality of life of all people through increase in real income per capital, improvements in education, health and general quality of life and improvements in the quality of natural environmental resources, thereby linking this definition with economic development.

In United Nation documents (2015) it states that sustainable development contains within its two concepts, namely "the concept of "needs". In particular the essential needs of the world prior to which overriding priority should be given and the idea of limitations imposed by the state of technology and social organizations on the environment and future needs"

Latur.

Sub: - Refund National Conference Paper present registration fees

R/Sir,

I have present a Paper in National Multidisciplinary Conference on Sustainable Development. The title of paper is "Global Best Practices adopted for sustainable development goals through Library and Information Science Professionals" held on 7 March.2022.

I have paid Rs.2000.00 as registration and paper submission. Please refund 50% amount of registration and paper submission fees as per college policy.

Thanking You,

Yours Faithfully

M.S. Rajmane
Librarian
